

## **Handwriting Without Tears**

If you have questions or concerns about whether your child might benefit from this program, contact your child's pediatrician or schedule a free screening with PhysioKids.

Handwriting Without Tears (HWT) is a developmentally based program created by Jan Z. Olsen, an occupational therapist with more than 25 years of experience training and teaching handwriting.

The goal of HWT is for handwriting to become a natural, automatic skill for children.

The unique teaching techniques and creative workbooks in the HWT program help children eliminate problems with letter formation, reversals, neatness, and sentence spacing.

HWT is taught in the developmental stages of:

- Pre-Writing Readiness
- Printing capital letters & numbers
- Printing lowercase letters

The style is a simple, vertical style that allows children to master the mechanics of handwriting with ease and confidence.

HWT is appropriate for children of all ability levels.
